Hepatitis B Surface Antigen(HbsAg)(-)	Non-reactive	Non-reactive

Authorized By

Dr. Amitabh Bachchan

MBBS

Registration Number : 12345678

Test Methods

1. Lateral Flow
Immunochromatography

Notes, Interpretation & Interfering Factors

1. This test is meant for screening purpose.
2. Recent exposures(<=6 months) cannot be detected.
3. A positive test requires confirmation by an alternative method.
4. Patients on biotin supplements should be tested 8 hours after the cessation of biotin. Biotin supplements can affect the assay method and results.
5. Infants below 6 months of age do not show consistent results for HbsAg testing, testing is indicated only after 6 months.

1. 'Sample Received At' refers to the date and time of the first sample collection done for a patient, for a given set of tests. In case of subsequent collections(eg in case of Fasting and PP, suppression or stimulation tests) the time may not reflect the actual time of collection.
2. Methods of measurement are mentioned together at the bottom of each report, test units to the right of each test name. All reports are subject to clinical correlation and not intended for forensic purposes.
