

Patient Details

Name : Priti Khanna
Date of Birth : 1 Jun 1951
Age : 71 years/Female
Referred By : Self

Report Details

Name : Vitamin D (25 Hydroxy
Cholecalciferol or 25-OH Vitamin D)
Sampling Received At :
2023-01-25T00:10:23.507+05:30

Name	Result	Normal Range
Vitamin D (25 Hydroxy Cholecalciferol or 25-OH Vitamin D)(ng/ml)	35	20-50

Authorized By

Dr. Amitabh Bachchan
MBBS
Registration Number : 12345678

Test Methods

1. CMIA

Notes, Interpretation & Interfering Factors

- Vitamin D is vital for strong bones. It also has important, emerging roles in immune function and cancer prevention.
- Vitamin D compounds in the body are exogenously derived by dietary means from plants as 25-hydroxyvitamin D2 (ergocalciferol or calciferol) or from animal products as 25-hydroxyvitamin D3 (cholecalciferol or calcidiol).
- The total 25-hydroxyvitamin D (25-OH-VitD) level (the sum of 25-OH-vitamin D2 and 25-OH-vitamin D3) is the appropriate indicator of vitamin D body stores.
- Patients with renal failure can have very high 25-OH-VitD levels without any signs of toxicity, as renal conversion to the active hormone 1,25-OH-VitD is impaired or absent.

This is a sample report, on a dummy patient, signed by a dummy doctor. The actual report format may vary and you are requested not to compare with the same.

- 'Sample Received At' refers to the date and time of the first sample collection done for a patient, for a given set of tests. In case of subsequent collections(eg in case of Fasting and PP, suppression or stimulation tests) the time may not reflect the actual time of collection.
- Methods of measurement are mentioned together at the bottom of each report, test units to the right of each test name.All reports are subject to clinical correlation and not intended for forensic purposes.
